

Technip aims to be a leader in the Oil & Gas industry by creating maximum value for its clients and by protecting its employees and the environment in which they live through excellence in the preparation and management of the tenders, projects and contracts it executes.

## Our Objectives

- A company culture based on the highest standards of quality and continuous improvement.
- A “hands on” Quality Management system focused on operational excellence.

## Our Guidelines

- Five Quality principles:
  - Focus on operational tasks
  - Do it right first time
  - Assess risks and prioritize resources accordingly
  - Knowledge must be shared and made accessible
  - Make commitments that are in line with our expertise.
- Management shall demonstrate its implication and leadership.
- Each manager, supervisor and employee shall be responsible for meeting Technip’s Quality standards and be accountable for his or her individual performance and the performance of those working under his or her supervision.
- Technip shall ensure that its subcontractors apply Quality standards which are fully compatible with those of Technip.
- Technip shall provide adequate resources and training to ensure that its activities are performed in a safe and professional manner.
- Technip shall ensure that all Quality incidents are duly noted, investigated and that corrective action is implemented and communicated across the Group.
- Technip shall ensure that a comprehensive reporting and audit system is developed to measure its performance against set goals and objectives, and that these reports are formally reviewed by management.
- Quality teams shall be both empowered and accountable.
