

# Solutions for NonDestructive Testing (NDT)

Monitoring and inspection of parts and structures

## Examples of applications

- Customer support for the inspection of new materials and the deployment of dedicated procedures
- Development of inspection and monitoring tools
- Structures damage surveillance, qualification tests in laboratory or on site monitoring
- Followup of damage before and after mechanical tests (in connection with our mechanical testing laboratory)
- Active infrared detection of cracks, porosities, delamination, inclusion, water, poor interlayer welding, lack or excess of glue
- Inspection of tubes and plates (composite, PE, steel...)
- Control of equipment for transport and storage of chemical and petrochemical products
- Corrosion detection and control
- Periodic pressure vessels requalification check

### Cybernetix - A Technip Energies Company

Technip Energies  
Parc Technologique des Rives de l'Oise  
Rue Les Rives de l'Oise - CS 50149 -Venette  
60201 Compiègne Cedex  
Standard : + 33 (0)3 60 45 70 17

## Our NDT expertise

### Ultrasonic Technology

Inspection of materials, composite parts and steel and development of specific inspection tools

### Infrared Thermography

Expertise in active infrared thermography for the detection of surface and sub-surface defects on composite and polymer materials

### Electromagnetism

Expertise on a wide range of technologies such as eddy current, impedance measurement and ACFM (Alternative Current Field Measurement)

### Acoustic Emission

Double expertise in acoustic emission and mechanics for the integrity control of materials and structures submitted to mechanical stresses

## Our means

Dedicated NDT laboratory equipped with the following means:

- Vallen acquisition system for acoustic emission monitoring
- Olympus Omniscan Mx2 and Eddyfi Gekko ultrasonic systems with single-element, multi-element, matrix sensors
- Ultrasonic inspection tanks 4 axes
- Electromagnetic systems Eddyfi Ectane 2, Sensima UPEC, Suragus TF Inline
- Complete active IR system with X6520sc quantum infrared camera
- Acquisition and processing software (Tomoview, Civa analysis, Matlab)

Synergy between our design office, mechanical laboratory and our NDT solutions to meet the needs of our customers
